

## April 10th

TIME	TOPIC
<b>10.00 - 12.00</b>	Registration
<b>12.00 - 12.15</b>	Opening Remarks
<b>12.15 - 12.45</b>	Key note Lecture
<b>12.45 - 13.05</b>	Equilibrium phase behavior and dynamic interfacial properties of rhamnolipid and ethoxylate mixtures
<b>13.05 - 13.25</b>	Combining SAXS and statistics to study self-assembly of surfactants from renewable resources
<b>13.25 - 13.55</b>	Optimizing Biosurfactant Formulations: A Systematic Approach Using Diffusive Wave Spectroscopy
<b>13.55 - 14.15</b>	Coffee Break
<b>14.15 - 14.35</b>	Model particles to study interaction of microplastic particles
<b>14.35 - 14.55</b>	Inkjet-printed nanocomposites of hybrid nanoparticles and polyvinyl alcohol
<b>14.55 - 15.15</b>	Crystallization-driven Gelation and Solvent Exchange towards Sustainable, Thermally-stable and Flame-retardant Polymer Aerogels
<b>15.15 - 15.45</b>	Key note Lecture
<b>15.45 - 16.00</b>	Coffee Break /Vorbereitung Frame Programme
<b>16.00 - 17.00</b>	Frame Programme
<b>17.00 - 17.15</b>	Coffee Break
<b>17.15 - 17.35</b>	Functional and Biocompatible Nanoobjects Synthesized by Polymerization-Induced Self-Assembly
<b>17.35 - 18.55</b>	Synergism and kinetics of lipase-peptide systems for solid fat removal at low temperatures
<b>17.55 - 18.15</b>	Investigating the interactions between the biosurfactant rhamnolipid and cationic guar gum using light scattering based microrheology
<b>18.15 - 18.35</b>	Decoding Pentapeptide Self-Assembly: Multiscale Simulation Approach
<b>18.35 - 18.55</b>	Self-assembly of Gliadin Peptides in Health and Disease
<b>18.55 - 19.15</b>	Atypical Effects of Overlooked Common Aspects on Urease Activity
<b>19.15 - 20.15</b>	Poster Session
