Palm (Kernel) Oil Suppliers List 2022

At Henkel we use ingredients based on palm oil, palm kernel oil and their derivatives to manufacture our laundry detergents, household cleaners, hair and body care products, and selected adhesive products. This represents less than 0.2 percent of the palm oil and palm kernel oil produced worldwide or an approximate annual quantity equivalent to 106,389 metric tons of palm-based ingredients. Our company is at the end of a long and often highly complex supply chain. For this reason, and as part of our supplier management program, we are working to improve the transparency and traceability of our upstream supply chains. We see this as a key effort to ensuring sustainable agricultural practices and fair working conditions. One element of this program is the annual publication of our palm (kernel) oil suppliers list. At Henkel we source our palm-based ingredients from a range of suppliers. Below we publicly disclose the list of our key palm (kernel) oil suppliers, who have not declined consent for publication and who cover approximately 90% of our palm (kernel) oil volumes purchased in 2022¹:

Aekyung Chemicals	Kensing
BASF	KLK
Brenntag	LG Chem
Cargill	Pilot Chemical
Fountain	Sasol
Galaxy Surfactants	Sinarmas Cepsa
GAR	Stepan
ICOF Europe	Toyota
Indorama	Wilmar

¹ Excluding divested Russian Portfolio
