

Multan® 46-81

For a clear view by grinding

Multan

Multan® 46-81 A fully synthetic water soluble coolant without EP-Properties for grinding of cast iron and steel

Henkel

The aqueous solution offers the following benefits:

- Very high bacterial stability by the use of top quality raw materials and a proven combination of boron additives and biocides
- Very good corrosion protection
- Very low fogging and misting tendency (especially for roll grinding)
- No sticky deposits e.g. on measuring equipment, tool holder and machine tools
- Low drag-out rate as the finely dispersed emulsion runs off the machined parts quickly
- The solution stays transparent in use, therefore exceptionally good control possibilities of the work piece by the machine operator during grinding

Achieves a high level of process economy:

- Low initial fill concentration (3 – 5%) and lower top-up concentration (0,5 – 1,5%)
- Low-foaming tendency for use with all water hardnesses including deionized water

Applications:

Suitable for a broad range of grinding operations: disk-, cylinder- and roll-grinding, circular- and flat grinding

Suitable for a broad range of materials: cast iron, steel, high alloy steel, and non-ferrous metals

Yes! I want to know more about **Multan® 46-81!**

You are interested in **Multan® 46-81** and want to know more about this product?
