TecTalis replaces zinc phosph  
This coating is significantly thinner than  
TecTalis is suitable

## GREEN

Yields significant savings in waste water treatment and waste disposal as well as machine cleaning and maintenance.

- LESS SLUDGE
- LESS WATER
- NO HEATING

sphating and forms a cohesive, inorganic, high  
than zinc phosphate coatings and has been s  
ole for dip and spray applications.

## EASY

Integrated process control improves  
production reliability.

- BROADER OPERATION WINDOW
- FACILE CONTROL
- RELIABLE QUALITY

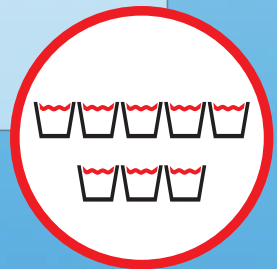

gh-density coating.

specifically developed for all metal surfaces, li

## FAST

Increased efficiency in green- and brownfield operations.

- LESS STEPS
- SHORTER CONTACT TIME
- SIMPLE TO START

, like steel, zinc or aluminum.

## EFFICIENT

Strengthen competitive positioning by superior environmental performance and reduced overall complexity.

- LESS MAINTENANCE
- LESS ENERGY
- HIGHER PRODUCTIVITY

# Zinc different!

Take the huge leap in metal-coating
