

## Press release

Düsseldorf, May 29, 2008

DRUPA 2008: Henkel introduces a modular Liofol® laminating adhesives system.

### Complete adhesive solution with three components

Henkel's new hardener component Liofol® UR 6029-21 can be used with either solvent-based or solvent-free main components of standard systems. By using this modular system, manufacturers of flexible packages, who have so far been using solvent-free and solvent-based adhesives systems, now need one component fewer. The formulation of Liofol UR 6029-21 includes renewable raw materials. With this product, Henkel is therefore also making a valuable contribution to resource conservation.

Henkel's new hardener Liofol® UR 6029-21 is the first modular component on the market that is compatible with both solvent-free and solvent-based systems. This will considerably simplify the use of laminating adhesives in the industry. With the aid of a dosing device, it is possible to alternate between these two adhesives systems during the production process, without having to stop to change equipment. Furthermore, the modular system reduces the risk of components being confused during day-to-day operations.

#### Major innovation for standard systems

With its modular Liofol® system, Henkel has proven that major innovations are still possible in standard systems. Combined with the solvent-free component Liofol® UR 7733-21, the new hardener yields a laminating adhesive designed for high machine speeds. Mixed with the solvent-based component Liofol® LA 3760-21, it creates a standard laminating system with a broad range of applications that features high initial tack and good adhesive properties even on aluminum foils.

#### Liofol® Academy user forum

Liofol® Academy consists of a series of international events at which the latest trends in flexible packaging are presented. Experts from Liofol team up with industry co-suppliers (e.g. machinery, ink and film suppliers) to deliver the newest application technology for converting processes. In addition, attendees of Liofol® Academy events are the first to learn of innovative new products for the industry. This interactive forum gives experts and decision makers the information they need to improve their business. Further information, dates, and locations regarding Liofol® Academy can be found at [www.liofolacademy.com](http://www.liofolacademy.com).

For more than 130 years, Henkel has been a leader with brands and technologies that make people's lives easier, better and more beautiful. Henkel operates in three business areas – Home Care, Personal Care, and Adhesives Technologies – and ranks among the Fortune Global 500 companies. In fiscal 2007, Henkel generated sales of 13,074 million euros and operating profit of 1,344 million euros. Our approximately 58,000 employees worldwide are dedicated to fulfilling our corporate claim, "A Brand like a Friend," and ensuring that people in more than 125 countries can trust in brands and technologies from Henkel.
