

HENKEL TECHNOLOGY SUPPORTS COMPLETION OF THE SAGRADA FAMILIA'S CENTRAL TOWERS

A DREAM COME TRUE

- The central towers of the Sagrada Família have now been completed.
- Their completion coincides with the centenary of Antoni Gaudí's death
- A vision conceived for future generations
- A challenge that demanded a solution

What Gaudí imagined... **is reality today.**

LOCTITE EA 9497

 24 tons
of adhesive

 Applied in
liquid form

 Cured in
24 hours

HOW MUCH CAN THE STRUCTURE WITHSTAND?

Thanks to the adhesive, stone and steel act
as a single structure.

100,000 PEOPLE IN 1 M²

EXCELLENCE UNDER EXTREME CONDITIONS

65-75%
humidity

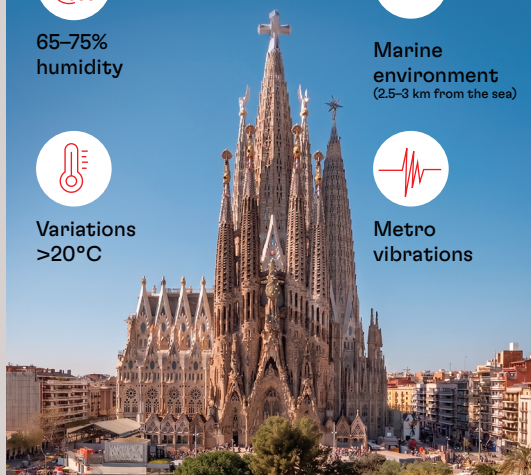

Marine
environment
(2.5-3 km from the sea)

Variations
>20°C

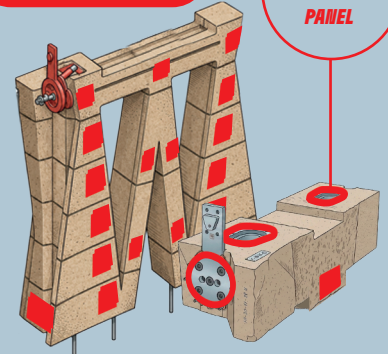

Metro
vibrations

UNITING STONE AND STEEL

826 PANELS

**30 KG OF
ADHESIVE PER
PANEL**

+2,100+ STONE PIECES

ACCELERATING CONSTRUCTION

10X FASTER

THE RESULT: A NEW ICON FOR BARCELONA AND THE WORLD

Global icon:

It now rises 172.5 m high, surpassing
Ulm Minster (162 m) as the tallest
religious building in the world.

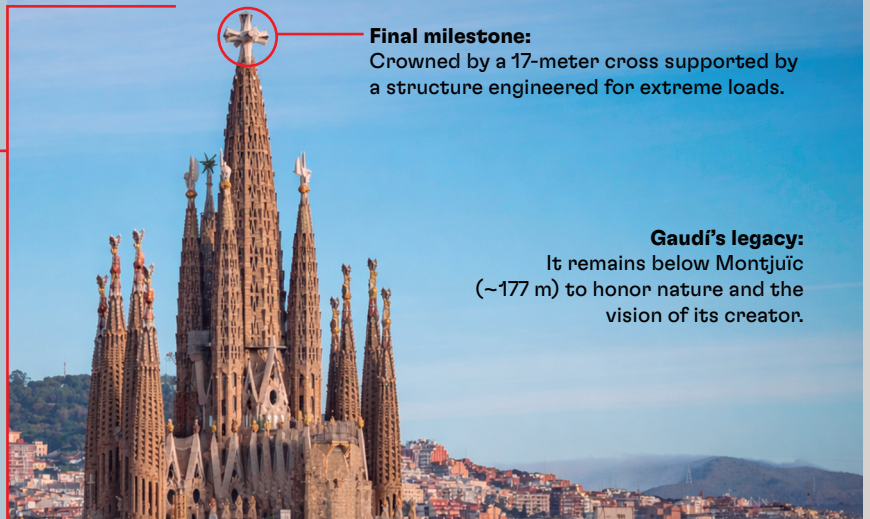

Impact:

The new highest point in Barcelona's skyline and
a benchmark for global architecture.

Final milestone:

Crowned by a 17-meter cross supported by
a structure engineered for extreme loads.

Gaudí's legacy:

It remains below Montjuïc
(~177 m) to honor nature and the
vision of its creator.

LOCTITE

The clearest proof that the future can be built today.
Future? Ready! For 150 years.

WE MAKE IT HAPPEN
