New Henkel online seminar

Webinar “Composite Surfacing and Lightning Strike Protection“

Surfacing films are designed to improve the surface quality of honeycomb stiffened composite parts. They also provide a barrier for dissimilar materials, decrease surface preparation time and provide protection of structural fibers. But this is not all: Laminated films composed of a surfacing film and a conductive metal foil protect the composite structure from damage caused by lightning strikes. Henkel will be holding a webinar on “Composite Surfacing and Lightning Strike Protection” on August 13th, 2014 at 08:00 PM (CET). Mr. Steven Cunningham will give an overview about surfacing films for aircrafts.

The purpose of the live webinars is to shed light on important issues surrounding the aerospace industry. They allow participants to gain further knowledge and interactively deepen their personal expertise on innovative solutions in a very convenient way. The free webinars allow to communicate directly with Henkel experts.

Primary topics:

- Surfacing films for aircrafts
- Lightning strike protection
- Out of Autoclave solutions
- High thermal fatigue resistance
- Process labor reduction

Webinar Online Time:

UTC: 07:00 PM - 08:00 PM

PDT: 11:00 AM - 12:00 AM

EDT: 02:00 PM - 03:00 PM

CET: 08:00 PM - 09:00 PM

Registrations at:

<https://www1.gotomeeting.com/register/568197321>

Replay will be available after the webinar, under the same link above.

Presenter's Bio

Steven Cunningham, Global Assembly Segment Manager, Aerospace, Henkel, has over 35-years experience in the aerospace materials business. He has worked in a variety of roles including research and development, technical support, engineering, operations, quality and marketing. His experience includes the development and use of epoxy adhesives for a wide range of aerospace applications including aircraft structures and interiors. His materials experience is centered around epoxy structural adhesives as well as lightning strike protection for composite structures. He received his BS degree in Business and MBA in Operations Management from Golden Gate University.

Henkel operates worldwide with leading brands and technologies in three business areas: Laundry & Home Care, Beauty Care and Adhesive Technologies. Founded in 1876, Henkel holds globally leading market positions both in the consumer and industrial businesses with well-known brands such as Persil, Schwarzkopf and Loctite. Henkel employs about 47,000 people and reported sales of 16.4 billion euros and adjusted operating profit of 2.5 billion euros in fiscal 2013. Henkel's preferred shares are listed in the German stock index DAX.
