Henkel Adhesive Technologies received more than 30 awards in 2015

Customers Recognize Solutions from Henkel

In 2015, Henkel Adhesive Technologies again received more than 30 awards from customers around the world. These prizes have been granted among various industries for categories such as quality, excellence and innovation.

Henkel Adhesive Technologies is the leading solution provider for adhesives, sealants and functional coatings worldwide. Based on its comprehensive technology portfolio and the expert knowledge of its global specialists the Henkel business unit develops tailor-made solutions that offer added value for around 130.000 direct customers in various markets.

Adhesive know-how for example is a key ingredient in the production processes of the automotive industry. FCA US LLC (FCA US), a subsidiary of Fiat Chrysler Automobiles N.V., thus counts on innovative solutions from Henkel and granted the company for its outstanding performance with its “Excellence in Supply Award”.

Adhesive Technologies also received the “Outstanding Supplier Award” from Hengan International Group, China’s largest manufacturer of household tissue paper, feminine sanitary napkins, and baby diapers, in appreciation for Henkel’s recent efforts in this long lasting partnership.

Independent Carton Group recently granted its “Supplier of the Year” award to Henkel. Adhesive Technologies successfully competed against 40 competitors in terms of quality, service and flexibility.

International media have also been keen to recognize the customized solutions that Henkel provides. The electronics journal “EM Asia Magazine” chose Henkel for its “EM Innovation Award” in recognition of the innovation Loctite GC 10, the first-ever temperature stable solder paste. The trade press magazine “Circuit Assembly Magazine” gave an award to Loctite GC 10 for newly introduced products – the “NPI

Award". The category of solder materials is always highly competitive, but Loctite GC 10 was the clear winner based on the analysis of factors such as creativity, innovation, flexibility and cost efficiency. As a result of the unique performance of the new product The Morey Corporation, an US-based electronics manufacturing services partner bringing innovation to the electronics industry, recently expanded the longstanding partnership with Henkel and selected the company as primary solder and adhesives provider.

Henkel operates worldwide with leading brands and technologies in three business units: Laundry & Home Care, Beauty Care and Adhesive Technologies. Founded in 1876, Henkel holds globally leading market positions, both in the consumer and in the industrial businesses, with well-known brands such as Persil, Schwarzkopf and Loctite. Henkel employs about 50,000 people and reported sales of 16.4 billion euros and adjusted operating profit of 2.6 billion euros in fiscal 2014. Henkel's preferred shares are listed in the German stock index DAX.
