

Henkel Adhesive Packaging Recycling Program – Anaerobic Adhesives

Instructions for Participation

The Adhesive Packaging Recycling Program for anaerobic packaging is made possible through our innovative partnership with TerraCycle®. Through this program, your business can launch or meet your company-wide sustainability goals while still enjoying the benefits of your favorite Henkel products.

How to Order

To discuss bringing the Adhesive Packaging Recycling Program to your business, please contact your Henkel Distributor or LOCTITE® Industrial Salesperson.

How to Collect

1. Once you have received your official recycling box, we suggest placing it in an area where Henkel anaerobic adhesives are often used and/or discarded.
2. Discard all LOCTITE® anaerobic adhesive packaging in your recycling box. All bottles must be capped and tightly closed prior to placing them in the recycling box.

How to Ship

1. When your recycling box is full, seal the liner using the zip tie that is included under the lid of your box.
2. Then securely seal the top of the box with packing tape.
3. Take the sealed box to an Australia Post location to be sent to TerraCycle for recycling. Your box already has a pre-paid Australia Post shipping label affixed.

Any Questions?

If you have any questions, please do not hesitate to contact your Henkel Distributor or LOCTITE® Sales Engineer.
