Henkel's Food Safe Packaging webinars in 2019

### Be prepared to meet changing global food safety requirements

Düsseldorf – Global food safety regulation is becoming increasingly complex. For the packaging industry, this means that the assurance of their food safety measures meeting the necessary requirements will continue to be a key challenge in 2019. As a market leader for high-impact adhesive solutions for the packaging industry, Henkel is committed to sharing its knowledge of the broad and complex field of food safe packaging with its industry partners. This is why Henkel's senior experts in food safe packaging will be hosting a range of dedicated webinars on this topic over the course of the year. These webinars will provide valuable insights into regulation topics such as "Fundamentals of global legislation for adhesives in food contact". As mineral oils continue to dominate the industry discussion – particularly in Europe – Henkel will again offer a webinar on "Mineral oil components in food packaging – What you need to know about adhesives". Analytics and testing will be covered in online seminars such as "Basics in migration analytics – Adhesives in food packaging", "Practical migration testing of laminating adhesives", and "Advanced migration testing for food safe packaging solutions".

The webinar series will start on March 13 and will be held in English. The webinar on mineral oil components will also be offered in a German version on October 9. Henkel provides the complete webinar calendar with details on dates, courses, and registration here: [www.packaging.henkel-adhesives.com/webinars](http://www.packaging.henkel-adhesives.com/webinars).

"Globally, the legal framework for food safety regulation is constantly changing. This is why the industry's need for information and the sharing of up-to-date knowledge is at an all-time high," explains Dr. Monika Tönneßen, Manager Product Safety and Regulatory Affairs at Henkel. "Our webinars are directed at all industry members involved in the food packaging value chain, such as converters, brand owners, and retailers." The webinars offered reflect Henkel's commitment to broaden

communication on food safe packaging and to bring together a wider range of professionals active in this field – from experts such as packaging developers, laboratory workers, and food safety managers to generalists such as plant managers. Participation in the webinars is free of charge for Henkel partners and customers in the industry.

The webinars are a key element in the company's Food Safe Packaging Initiative ([www.henkel.com/foodsafety](http://www.henkel.com/foodsafety)).

#### **About Henkel**

Henkel operates globally with a well-balanced and diversified portfolio. The company holds leading positions with its three business units in both industrial and consumer businesses thanks to strong brands, innovations and technologies. Henkel Adhesive Technologies is the global leader in the adhesives market – across all industry segments worldwide. In its Laundry & Home Care and Beauty Care businesses, Henkel holds leading positions in many markets and categories around the world. Founded in 1876, Henkel looks back on more than 140 years of success. In 2018, Henkel reported sales of around 20 billion euros and adjusted operating profit of around 3.5 billion euros. Henkel employs more than 53,000 people globally – a passionate and highly diverse team, united by a strong company culture, a common purpose to create sustainable value, and shared values. As a recognized leader in sustainability, Henkel holds top positions in many international indices and rankings. Henkel's preferred shares are listed in the German stock index DAX.
